apicbase

Apicbase – Junior Front-end developer

The Right Fit?

Apicbase is a fast-growing Belgian scale-up developing software for the Hospitality Industry. We're on the hunt for a talented Junior Frontend Developer with a passion for intuitive design and a drive to turn complex software into user-friendly experiences.

As part of our agile team, you will:

- Write clean, maintainable frontend code using Vue.js and style with SASS.

- Transform concepts and designs into engaging features with creativity and smart problem-solving.

- Troubleshoot issues and ensure the smooth performance of our SaaS platform.

- Work closely with product managers, designers, and backend developers to build a seamless user experience.

Who are you?

We value open-minded individuals with a growth mindset over niche experts.The following qualifications will help you hit the ground running:

- Eager to learn, receptive to feedback, and driven to continuously improve both individual work and team outcomes.

- Some experience with modern frontend frameworks such as Vue, React, or Angular.

- Comfortable translating UI/UX designs into functional interfaces using tools like Figma.

- Bonus: Familiarity with Python or Django is a plus, but not required.

What do we offer?

- A full-time and ultra-varied job at a well-funded, successful, and fast-growing scale-up

- Working in a company culture with ownership, self-responsibility and accountability

- Being part of a young, flexible and dynamic team that builds together the future of Apicbase

- The time to learn and master state-of-the-art technologies

- Possibility to travel to technology and food events

- An attractive and competitive salary
